EDUCATION

University of North Texas

M.S. in Business Analytics; GPA 3.8/4.0

Denton, Texas, USA

Aug 2024 - May 2026

Vellore Institute of Technology

B.Tech in Computer Science and Engineering

Amaravati, India

Aug 2020 - Jul 2024

WORK EXPERIENCE

Uber

Dallas, TX

Business Analyst Intern

May 2026 - Jul 2026

- Built a marketplace analytics framework integrating **20+ operational and customer KPIs**, improving performance gap identification across teams.
- Automated reporting workflows using **SQL and Python**, cutting manual data preparation by **30%** and saving **6 hours weekly**.
- Developed **4 interactive Tableau dashboards**, consolidating fragmented reporting into a centralized view for **25+ KPIs**.

University of North Texas

Denton, TX

Graduate Assistant

Dec 2025 - May 2026

- Assisted faculty with course delivery for a graduate analytics course, grading assignments and holding office hours for **40+ students**.
- Supported research data collection and cleaning using **Python and SQL**, prepping datasets for faculty-led analytics projects.
- Created supplementary lab material and walkthroughs that improved student comprehension of statistical modeling concepts.

Zynofus Technologies (OPC) Pvt Ltd

Chennai, India

Machine Learning Intern

Jan 2024 - May 2024

- Built and evaluated **ML models** for internal product use cases, handling data preprocessing, feature engineering, and validation.
- Collaborated with the engineering team to integrate model outputs into existing pipelines, improving prediction turnaround time.
- Documented model performance and experiment results, supporting faster iteration across the team.

PROJECTS

Predicting Psychological Risk Factors of Longevity | Python, ML

- Analyzed **225,058** behavioral health survey records as part of UNT Business Analytics capstone to predict whether a person seeks mental health treatment, based purely on observable behavioral factors.

Heart Disease Prediction using Risk Factors & ML | Python, ML

- Tested **Logistic Regression, ANN, and SVM** on a risk-factor dataset (blood sugar, age, sex, alcohol use), each reaching **~90% accuracy** in predicting cardiovascular risk.

ACHIEVEMENTS, PUBLICATIONS & CERTIFICATIONS

- Published: "Optimizing Minimum Spanning Tree Computation: An ANN Approach for Enhanced Efficiency in Graph Theory," IJARESM, Oct 2023.
- Certifications: Foundations of Project Management (Coursera, 2024) · Foundations of Cyber Security (Coursera, 2023) · Python Bootcamp: Zero to Hero (Udemy, 2021).

TECHNICAL SKILLS

Languages & Databases: Python, SQL, Snowflake, Qlikview

Data & ML Tools: Kafka, XGBoost, SHAP, Tableau

Core Fundamentals: Statistical Modeling, Data Pipelines
